## Profile

Passionate Full-Stack Developer experienced in building high-performance, scalable web applications using React.js, Next.js, Node.js, and SQL. Strong focus on UX, SEO, and clean architecture, with proven contribution to early-stage startup product development.

## Skills

- **Primary Skills:** React.js, JavaScript (ES6+), HTML5, CSS3 & Libraries
- **Tools & Cloud:** Git & GitHub, AWS S3, CI/CD
- **Secondary Skills:** Node.js, Python, SQL

## Work Experience

Nano Banana Gallery (Stealth Startup)

Nov 2025 to Present

### React Developer

- Developing the frontend for an early-stage **AI image-sharing platform** using **React and Next.js**.
- Implementing **Server-Side Rendering (SSR)** to improve SEO, crawlability, and initial page load speed.
- Building reusable UI components, dynamic gallery pages, upload workflows, and responsive layouts.
- Integrating REST APIs, handling data fetching, caching strategies, and optimizing performance.
- Collaborating directly with the founder to define features, build new modules, and deliver end-to-end functionality.
- Writing clean, maintainable code with proper Git version control and following best development practices.
- Working on speed improvements, SEO enhancements, and frontend-backend integration for production readiness.

UniQin.ai

July 2023 to Aug 2024

### Software Developer

- Ensured cross-browser and cross-device compatibility through rigorous testing and responsive design principles.
- Developed responsive and SEO-friendly web apps using React.js, Python, and SQL.
- Integrated REST APIs for authentication (Email & WhatsApp OTP) and dynamic data flow.
- Designed and maintained SaaS and e-commerce platforms with Chargebee payment integration.
- Managed AWS S3/EC2 deployment, ensuring uptime and scalability.
- Built modular reusable UI components and implemented performance optimizations.
- Collaborated with cross-functional teams to deliver end-to-end product solutions.
- Monitored application performance using Google Analytics, applied data-driven UI enhancements, and improved conversion rates.

## Projects

### E-commerce Platform

- Developed product pages, cart & checkout flow, integrated Email & WhatsApp OTP login, and payment gateway Chargebee.
- Built a fully responsive, SEO-friendly website using Framer + React, Python integrated REST APIs, and deployed on AWS EC2.
- Implemented Google Analytics tracking, analyzed user behavior, and optimized UI/UX and business performance metrics.

### E-Commerce Subscription Platform

- Developed a SaaS-based e-commerce web application allowing users to subscribe monthly for digital or physical products.
- Implemented subscription workflows using Chargebee payment integration for secure recurring billing.
- Designed pricing pages, invoice dashboard, and plan management modules using Nodejs with MongoDB.
- Created REST APIs for authentication, subscription plans, and payment tracking.
- Focused on clean architecture, scalability, and reusable React components for a seamless user experience.
- Improved data handling and performance with optimized SQL and server-side validation.

## Education

### **B.E Mechanical Engineering - 8.23**

Kongu Engineering College

July 2018 to June 2022

### **HSC - 86%**

St Lucy's Matric Hr Sec School

June 2017 to April 2018

### **SSLC - 91%**

June 2015 to April 2016

## Certificate

### **Python Full Stack Development**

- Completed 6–8 months intensive training (Frontend, Backend, SQL, Projects)
- Developed CRUD-based applications, focusing on clean architecture and best coding practices.
