SUMMARY

Frontend / Full-Stack Developer with **1+ year experience** building **responsive, SEO-friendly web apps** using **React.js, Vue.js, Quasar, Bootstrap, Tailwind, Python, and SQL**. Skilled in **REST API integration, AWS (S3, EC2) deployment, authentication systems (WhatsApp & Email OTP)**, and **UI/UX optimization** to drive business growth.

SKILLS

- **Frontend:** React.js, Vue.js, Bootstrap, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+)
- **Backend:** Python (Django), Java (Basics), REST API
- **Database & Data:** SQL, PostgreSQL, AWS Redshift
- **Cloud & DevOps:** AWS (S3, EC2), Deployment & Maintenance, Github

WORK EXPERIENCE

UniQin.ai

Software Developer

July 2023 - July 2024

- Developed **responsive, SEO-friendly, and cross-browser compatible web applications** using **React.js, Vue.js, Quasar, Bootstrap, and Tailwind CSS**.
- Integrated **REST APIs** for backend communication, including **user authentication (Email & WhatsApp OTP login/signup/reset)**.
- Built and maintained **SaaS products and e-commerce platforms**, managing product listing, order tracking, and payment integration using **Chargebee**.
- Deployed applications and managed databases on **AWS S3 and EC2**, ensuring **scalability, reliability, and uptime**.
- Implemented **Google Analytics tracking**, analyzing user behavior to optimize **UI/UX and business performance metrics**.
- Created modular, reusable frontend components and handled **bug fixing, performance optimization, and client-specific customizations**.
- Collaborated with cross-functional teams to deliver **end-to-end solutions** meeting business and client requirements.

EDUCATION

Kongu Engineering College

B.E Mechanical Engineering - 8.23

July 2018 - June 2022

St Lucy's Matric Hr Sec School

HSC & SSLC

PROJECTS

E-commerce Platform [🔗](#)

- **E-commerce Web Application(uniqin.ai):** Developed **product pages, cart & checkout flow**, integrated **Email & WhatsApp OTP login**, and payment gateway **Chargebee**.
- **Company Website:** Built a **fully responsive, SEO-friendly website** using **Framer + React**, integrated **REST APIs**, and deployed on **AWS EC2**.
- Implemented **Google Analytics tracking**, analyzed user behavior, and optimized **UI/UX and business performance metrics**.

E-commerce Admin Dashboard

- Built a **fully responsive dashboard** using **React.js & Bootstrap** for managing products, orders, and customers.
- Added **data visualization and analytics features** for better business insights.
- Created **modular, reusable components** for maintainability and scalability.
- Deployed on **Netlify**.

Job Management App

- Developed a **job posting and management platform** using **React.js & Bootstrap**.
- Implemented **dynamic job card grid, filter/search functionality, and CRUD operations** with **REST API integration**.
- Designed **responsive UI** for seamless experience across devices.
- Deployed on **Vercel**.

Personal Portfolio Website

- Built using **React.js + Tailwind CSS**, showcasing skills, projects, and contact info.
- Implemented **responsive design** for all devices and **SEO optimization** for better visibility.
- Deployed on **Netlify**.

CERTIFICATE

Python Full Stack Development

- Completed 6–8 months intensive training (Frontend, Backend, SQL, Projects)
- Developed CRUD-based applications, focusing on clean architecture and best coding practices.
